

PENETRATING WOOD STAIN

Quick drying, non-grain raising, no sand stain that will not raise the grain yet will assure smooth and even coloration. Can be added to our **Magna-Shield®**, our nitrocellulose lacquers, and our **EVERLAST™** Wood Finish for tinting or shading purposes. Pre-mix with lacquer thinner prior to addition to any lacquer or **Magna-Shield®**. Dries in 10 minutes. Can be top coated in 30 minutes. Additional shades can be created through intermixing. Apply by brush, spray or wipe on. If spraying on, apply an even coat, then wipe off all excess with a lint free cloth. **Not recommended for exterior application or direct sunlight exposure.** Concentrated – thinnable with our Wiping Stain Reducer, lacquer thinner or mineral spirits (to slow down drying time). In the event of blotching on soft woods, use the below or at right **Wood Conditioner** first per label directions. **Coverage 200 SF/gal.**

91660-	Quart
91662-	Gallon
91665-	5 Gal Pail
